

LACSD WARM UP BUCKETS

Fill this bucket from your sink or tub while waiting for the water to get hot. The water can then be used to irrigate your grass, trees, plants, shrubs or other vegetation. If you have a water softener, please be careful as your softener may use sodium that can be harmful to your plants. Please keep out of the reach of children.

To get a LACSD Warm Up Bucket, please mention you saw this on our website.

Only one bucket per household. Get yours while supplies last!
